

## Chinese (CCC) Certification

### Requirements:

- > Deadline: October 1, 2020, to have completed the CCC certification. This is for all manufacturers shipping product(s) into China regardless if it is manufactured in China or abroad.
- > To apply for a CCC certification a manufacturer must first have completed an IECEx certification
  - Existing IECEx certifications must be generated or updated within the last three years
  - The various standard(s) revisions must be consistent with IEC or newer
- > Audit: A CCC audit is required before obtaining certification
  - The length of the audit is dependent on the number of employees in the manufacturing facility
  - In 2020 the audits may be virtual
  - The frequency of the audit is determined after the initial audit. The norm is every other year so they can be aligned with a QAN/QAR audit.

### Information required:

- > Quotation
  - Product description
  - Product drawing
  - Rating label in Chinese
  - IECEx certificate
  - IECEx ExTR (test report)
- > Certification
  - Application form
  - User manual in Chinese
  - Rating label in Chinese
  - Business license of applicant/manufacturer/factory
  - Factory inspection questionnaire
