

# Incident Reporting

## Identify and evaluate incidents to reduce workplace risk

Adaptive Suite's Incident Reporting application reduces incidents and exposures, identifies exposures with SIF potential, and improves safety performance overall. Provide your safety managers with the necessary tools to effectively analyze root causes and develop effective corrective actions.

### How do we do it

#### Incident Reporting

The Incident Reporting application is configurable, allowing a user to track specific incident details and capability to assign and track corrective actions.

#### Features

- Customize incident types, forms, and investigations to what your programs currently track
- Pre- and post-risk assessment capabilities
- Track incident reports and investigations to completion
- Cost tracking
- Upload photos and supporting documents for detailed reference
- Analyze reports to identify incident trends and root causes
- Identify inadequate or ineffective policies, training, or behavior
- Assign corrective actions specific to incidents
- Enter and generate OSHA 300, 300A, and 301 forms (U.S. customers)
- Generate corrective action assignment notifications to key personnel's email or mobile device
- Available in multiple languages.
