

On the safe side.

# Virtual Audits and Inspections:

Fast and accurate. Led by an experienced DEKRA Representative.

## Conduct accurate, comprehensive audits without the time and expense of a site visit.

If you don't have the time or money to schedule a site visit, DEKRA's i2i technology facilitates accurate, comprehensive audits and inspections led by an experienced DEKRA representative. The tool is easy to use and supports remote automotive audits as well as truck, vehicle and equipment inspections.

### How It Works

The process is simple. Appointments for the requested services are scheduled in the i2i tool by contacting individuals at your or your customer location. Conducting the audit or inspection is as simple as clicking on a link to connect with a DEKRA representative for live, step-by-step instructions. There is no app to download, and the tool works with almost every browser on both Android and iOS devices.

The DEKRA representative will instruct the individual on-site how to access the device's camera to document the required information and walk them through the entire inspection or audit process. Our encrypted and safe video connection allows for the same high-quality videos and photos that would be used to complete a traditional, on-site inspection or audit. The data will be automatically stored and archived for future reference.

## Unbeatable Benefits

### Fast, comprehensive, accurate:

Lead by an experienced DEKRA expert

### Universal compatibility:

Works with almost any device. No app to download

### Quality video and photos:

Capture HD-quality photos while recording videos simultaneously

### Data security:

Data and connections are encrypted

### File accessibility:

Send and share files during the call

### Complete documentation

Full session is recorded for future reference
